Lucia Palacios

UX/UI DESIGNER

Background and profile

In 2009, I graduated in Set Design from the Royal School of Dramatic Arts (RESAD) in Madrid. I worked professionally in theater for a few years while also developing my skills as a graphic designer and illustrator.

Since 2015, I have been working as a graphic designer, both independently as a freelancer and as a team member in various companies.
After relocating to Ireland in 2016, I continued to advance my career in graphic design.

However, in 2019, I made the decision to expand and redirect my professional path toward the realm of User Experience.
I enrolled at the Technological University of Dublin and successfully completed a Master's program in UX and Interaction Design in September 2020.

While I find all aspects of the field fascinating, I have a particular affinity for design systems and the process of translating research into tangible design solutions.
